

# Are you Ready to be a Pentester?

# What will we Learn?

- 01 - Cybersecurity Introduction**
- 02 - Cybersecurity Fundamentals**
- 03 - Reconnaissance**
- 04 - Scanning**
- 05 - Exploitation**
- 06 - Vulnerability Assessment (VA)**
- 07 - Reporting**

# Cybersecurity

## Introduction

**01 - Ethical Hacking Introduction**

**02 - Cybersecurity Roadmap**

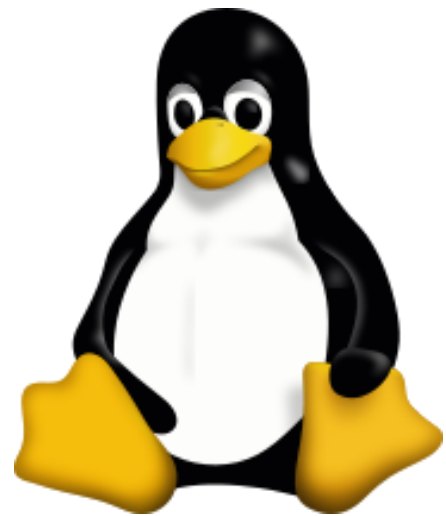

**03 - CIA Triad**

**04 - White hat, Grey hat, Black hat**

# Cybersecurity Fundamentals

- 01 - Networking Fundamentals**
- 02 - Linux Fundamentals**
- 03 - Pentest Fundamentals**

# **Hacking Phase :**

# **Reconnaissance**

**01 - Reconnaissance Introduction**

**02 - Passive & Active Recon**

**03 - Recon Tools Live Practice**

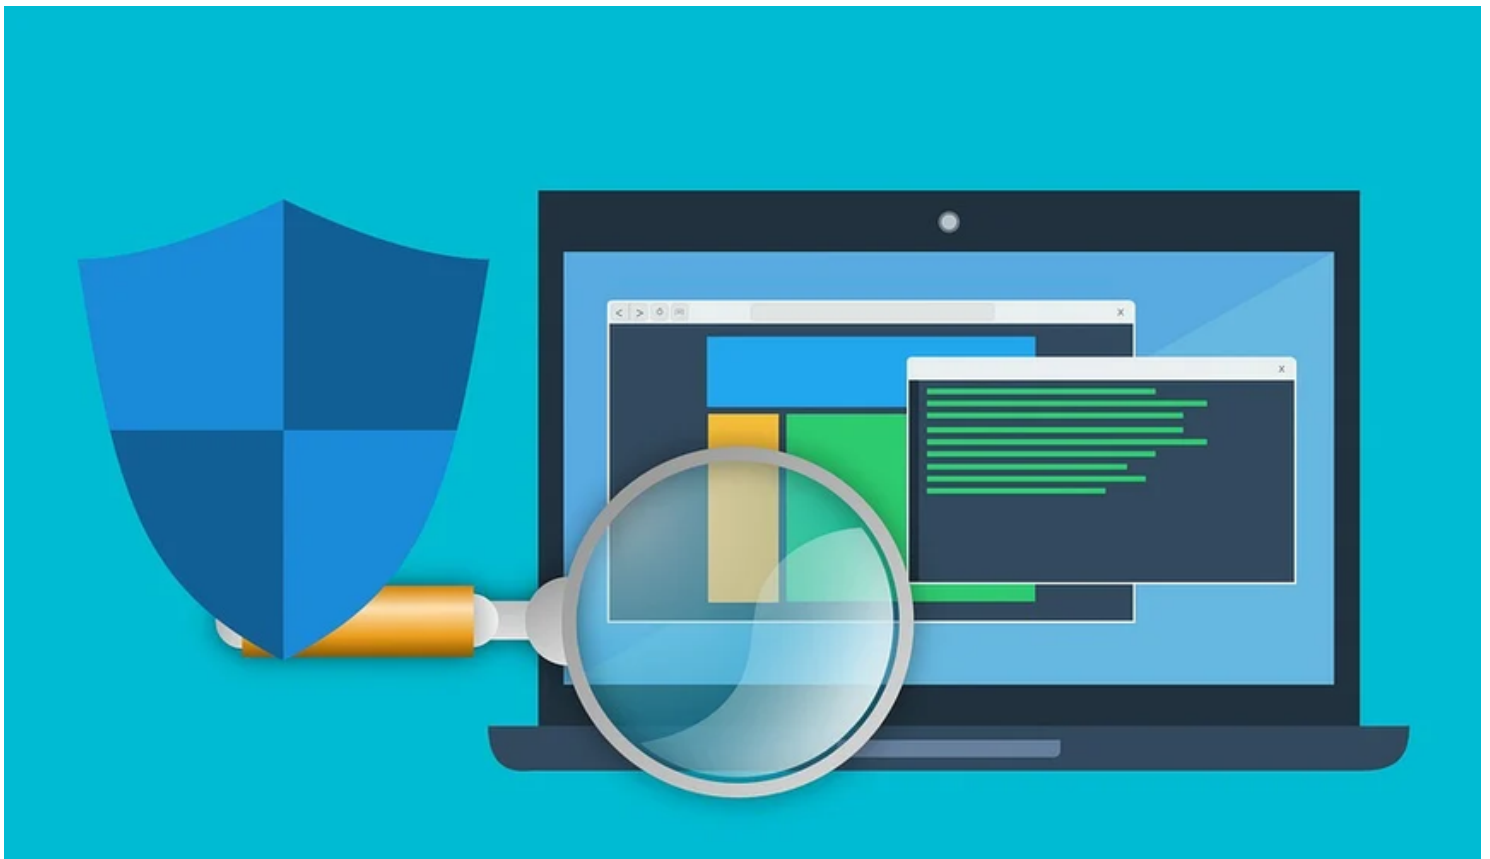

# Hacking Phase :

## Scanning

**01 - Scanning Introduction**

**02 - List of Scanning Tools**

**03 - Scanning Tools live Practice**

# Hacking Phase : Exploitation

- 01 - Exploitation Introduction**
- 02 - Bug finding Methodology**
- 03 - XSS, SQLi, IDOR, RCE, LFI, etc**
- 04 - Live Vulnerability Exploitation**

# Hacking Phase :

## VA & Reporting

**01 - VA & Reporting Introduction**

**02 - CVSS Score 3.1**

**03 - Bug Report Template**

**04 - Create a Good Report**

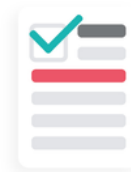

1. Asset  
discovery

2. Asset  
prioritisation

3. Vulnerability  
scanning

4. Result analysis  
& remediation

5. Continuous  
security

# **Hacking Toolkits**

## **Include :**

- 01 - Kali Linux**
- 02 - Nmap**
- 03 - Subfinder**
- 04 - HTTPX**
- 05 - Paramspider**
- 06 - Dirsearch**
- 07 - Shodan**
- 08 - Hunter Search Engine**
- 09 - Nuclei**
- 10 - Dalfox**
- 11 - SQL Map**
- 12 - Burpsuite**
- 13 - Metasploit**
- 14 - Slowhttptest**
